

Sabre Guard Patrol: Reseller Partner Program

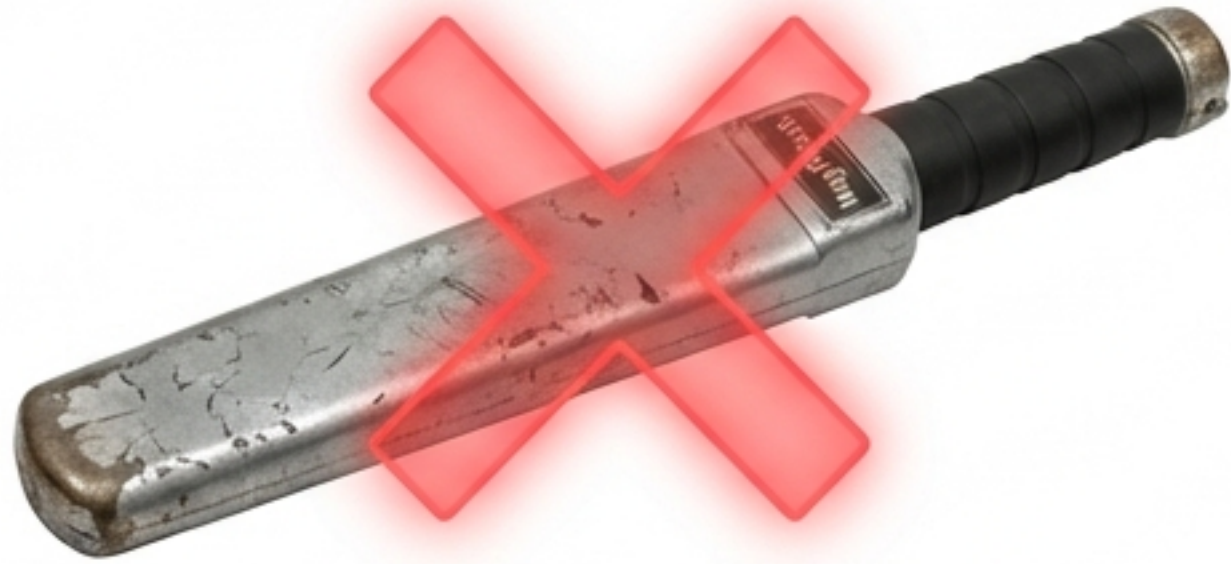

The Next-Generation Security Workforce Management Platform. Your Brand. Our Technology.

Powered by Sabre Products

The End of 'Wand & Baton' Security

Legacy Hardware

- Expensive proprietary units (R5,000+)
- No real-time data (offline downloads)
- Blind spots and easy manipulation

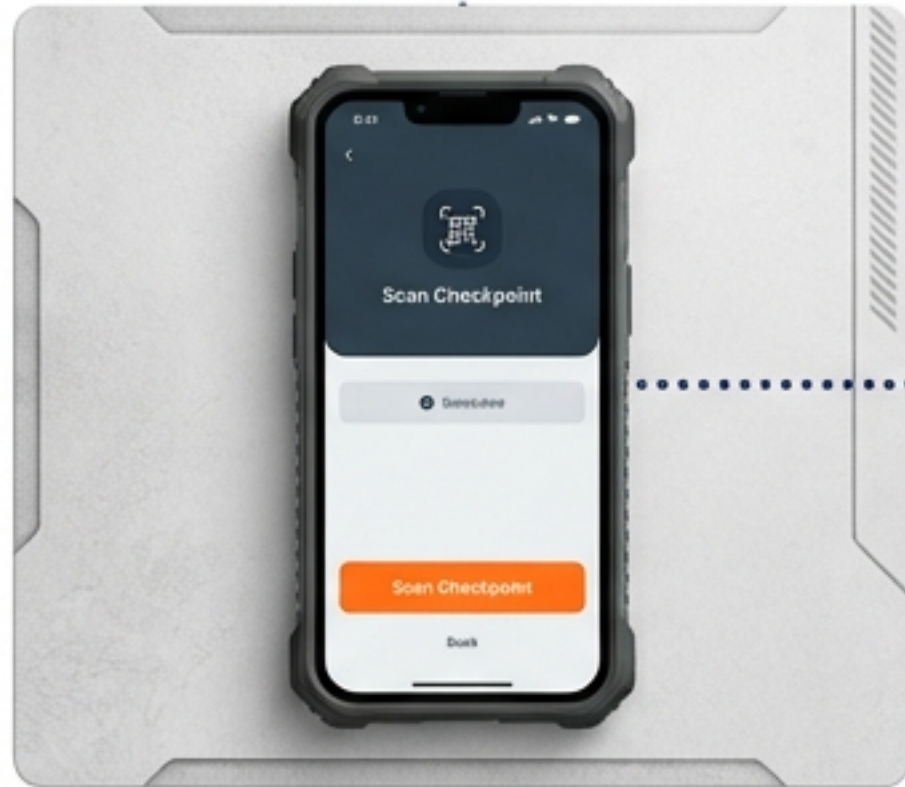

Mobile-First SWM

- BYOD: Use existing smartphones (R0 Cost)
- Real-time GPS tracking & visibility
- Zero hardware maintenance

The Opportunity: Modernize your client's security force while eliminating their hardware headaches.

A Complete Security Ecosystem

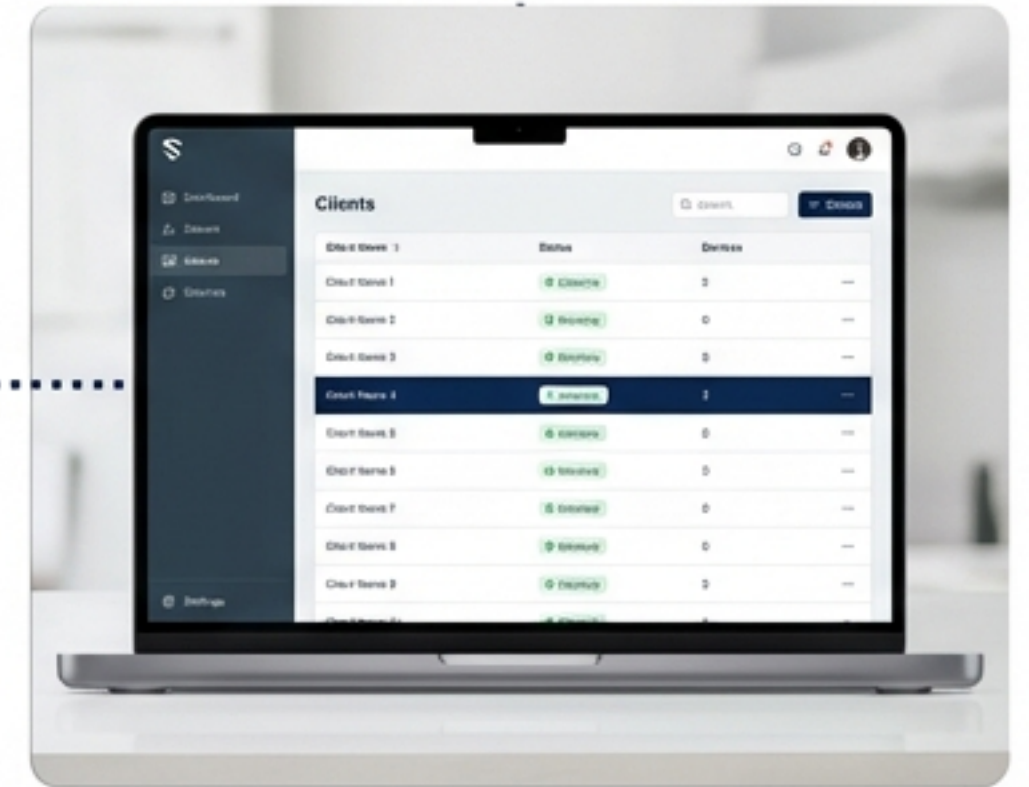

The Guard

Clock in, scan NFC/QR/GPS, and report incidents instantly.

The Supervisor

Real-time dashboards, live tracking, and compliance monitoring.

The Reseller

A fully white-labeled product ready to sell to your client base.

White-Label Ready

We provide the engine; you provide the brand.

Position Sabre Guard Patrol as your own proprietary technology.

- Your clients never see “Sabre Products”
- Build brand equity with every patrol
- Automated emails sent from your domain

Features That Win Contracts: Accountability

Solve the biggest complaint in the industry: “Was the guard actually there?”

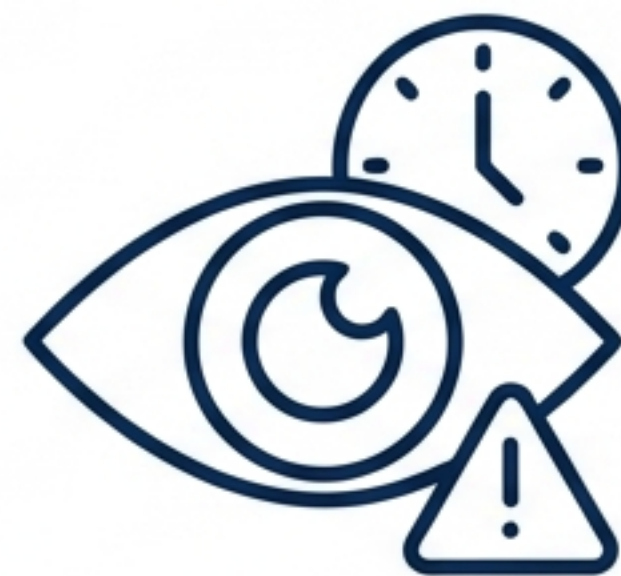

GPS Verification

Geofencing ensures guards are physically at the coordinate before scanning is allowed.

Biometric Auth

High-risk checkpoints require a selfie or fingerprint to prevent “buddy punching” or fraud.

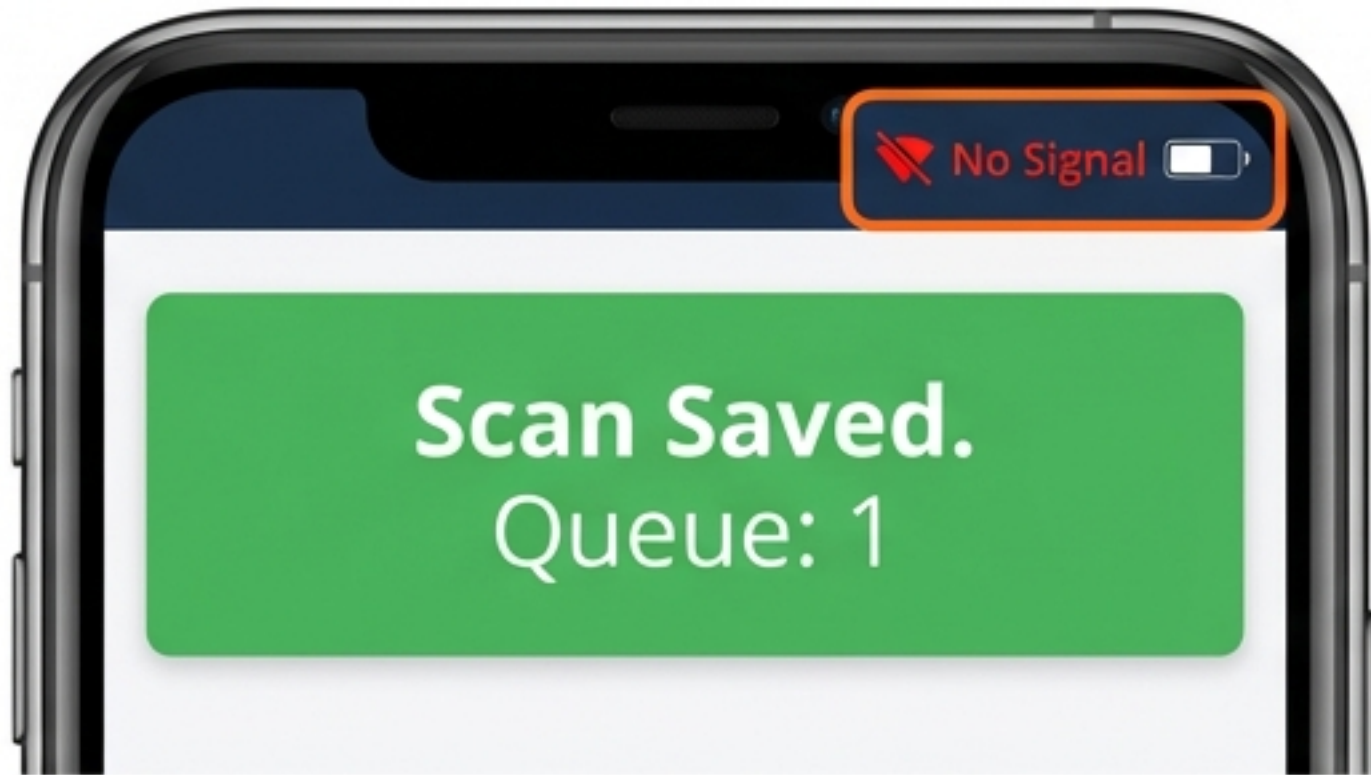

Stay-Awake Pings

Random prompts during night shifts ensure alertness. Missed prompts trigger immediate supervisor alerts.

Built for Reality: Offline & Connected

Designed specifically for the challenges of the South African security environment.

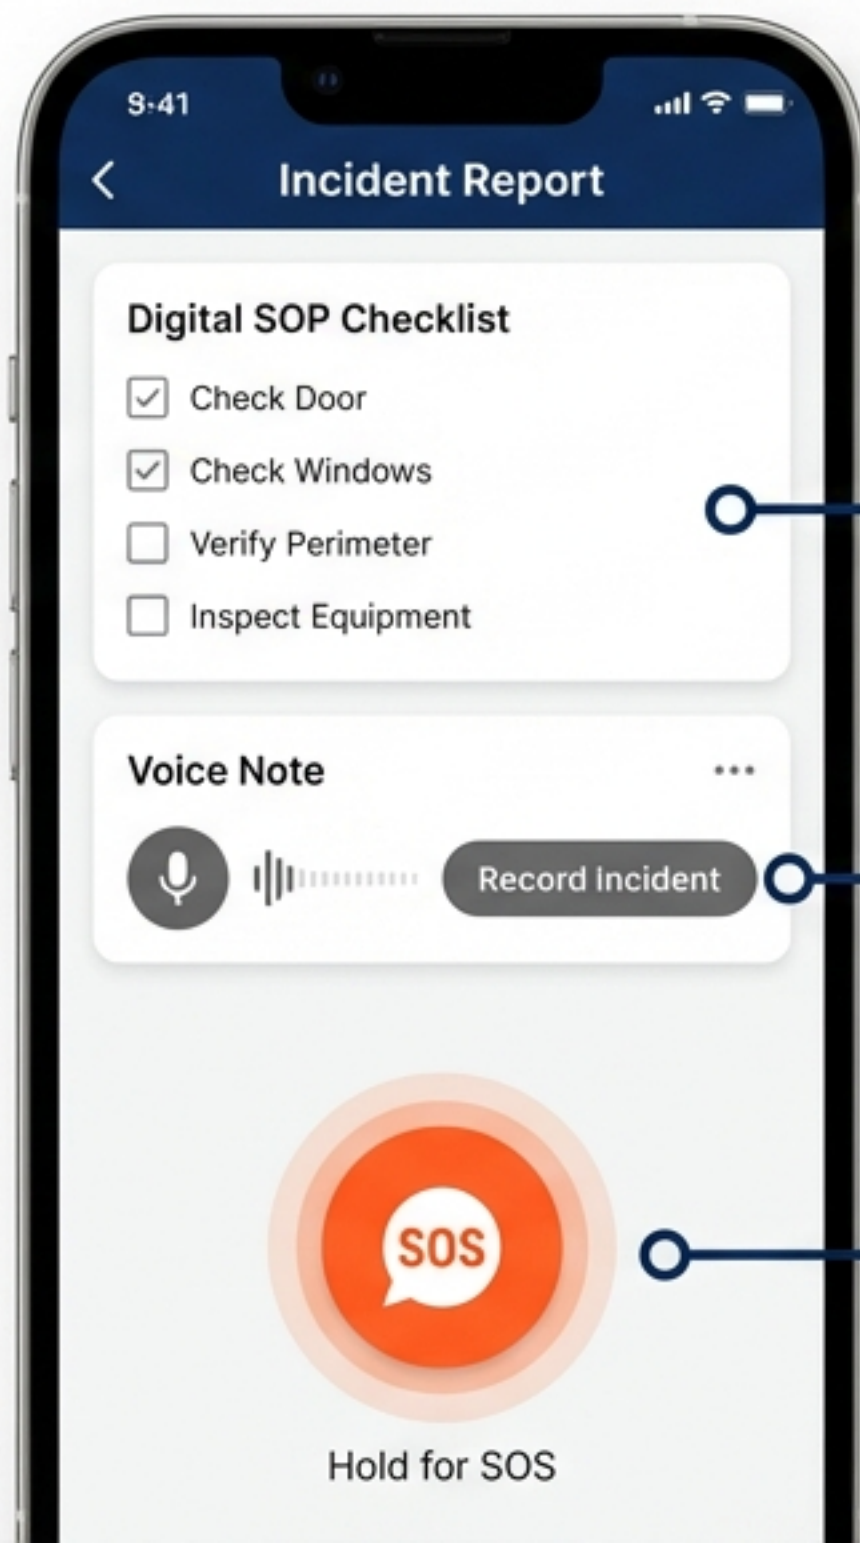

True Offline Mode: Store & Forward technology keeps working in basements and remote sites. Data auto-syncs instantly when signal returns.

WhatsApp Integration: Supervisors receive instant alerts for missed patrols or incidents directly on WhatsApp—the channel they already use.

Modern Operational Tools

Empowering teams with real-time, context-aware digital solutions.

SOS Panic Button

One-tap emergency alert with live audio streaming and exact GPS location.

Voice Incident Reports

Faster and more detailed than typing.

Digital SOPs

Context-aware checklists appear when scanning specific locations.

How You Make Money

We operate on a strict wholesale model. You control the margin.

- **You Set the Price:** We charge a flat fee. You bill the client whatever you choose.
- **Tiered Options:** Resell based on Per-Guard, Per-Site, or Per-Scan models.
- **Ownership:** You own the client contract. We act as your silent technical partner.

Revenue Potential

The Scale Effect

Manage 100 guards = **R5,000/month**
pure profit.

- **Zero** hardware inventory costs.
- **Zero** hardware maintenance costs.
- 100% recurring revenue.

Profit Calculator

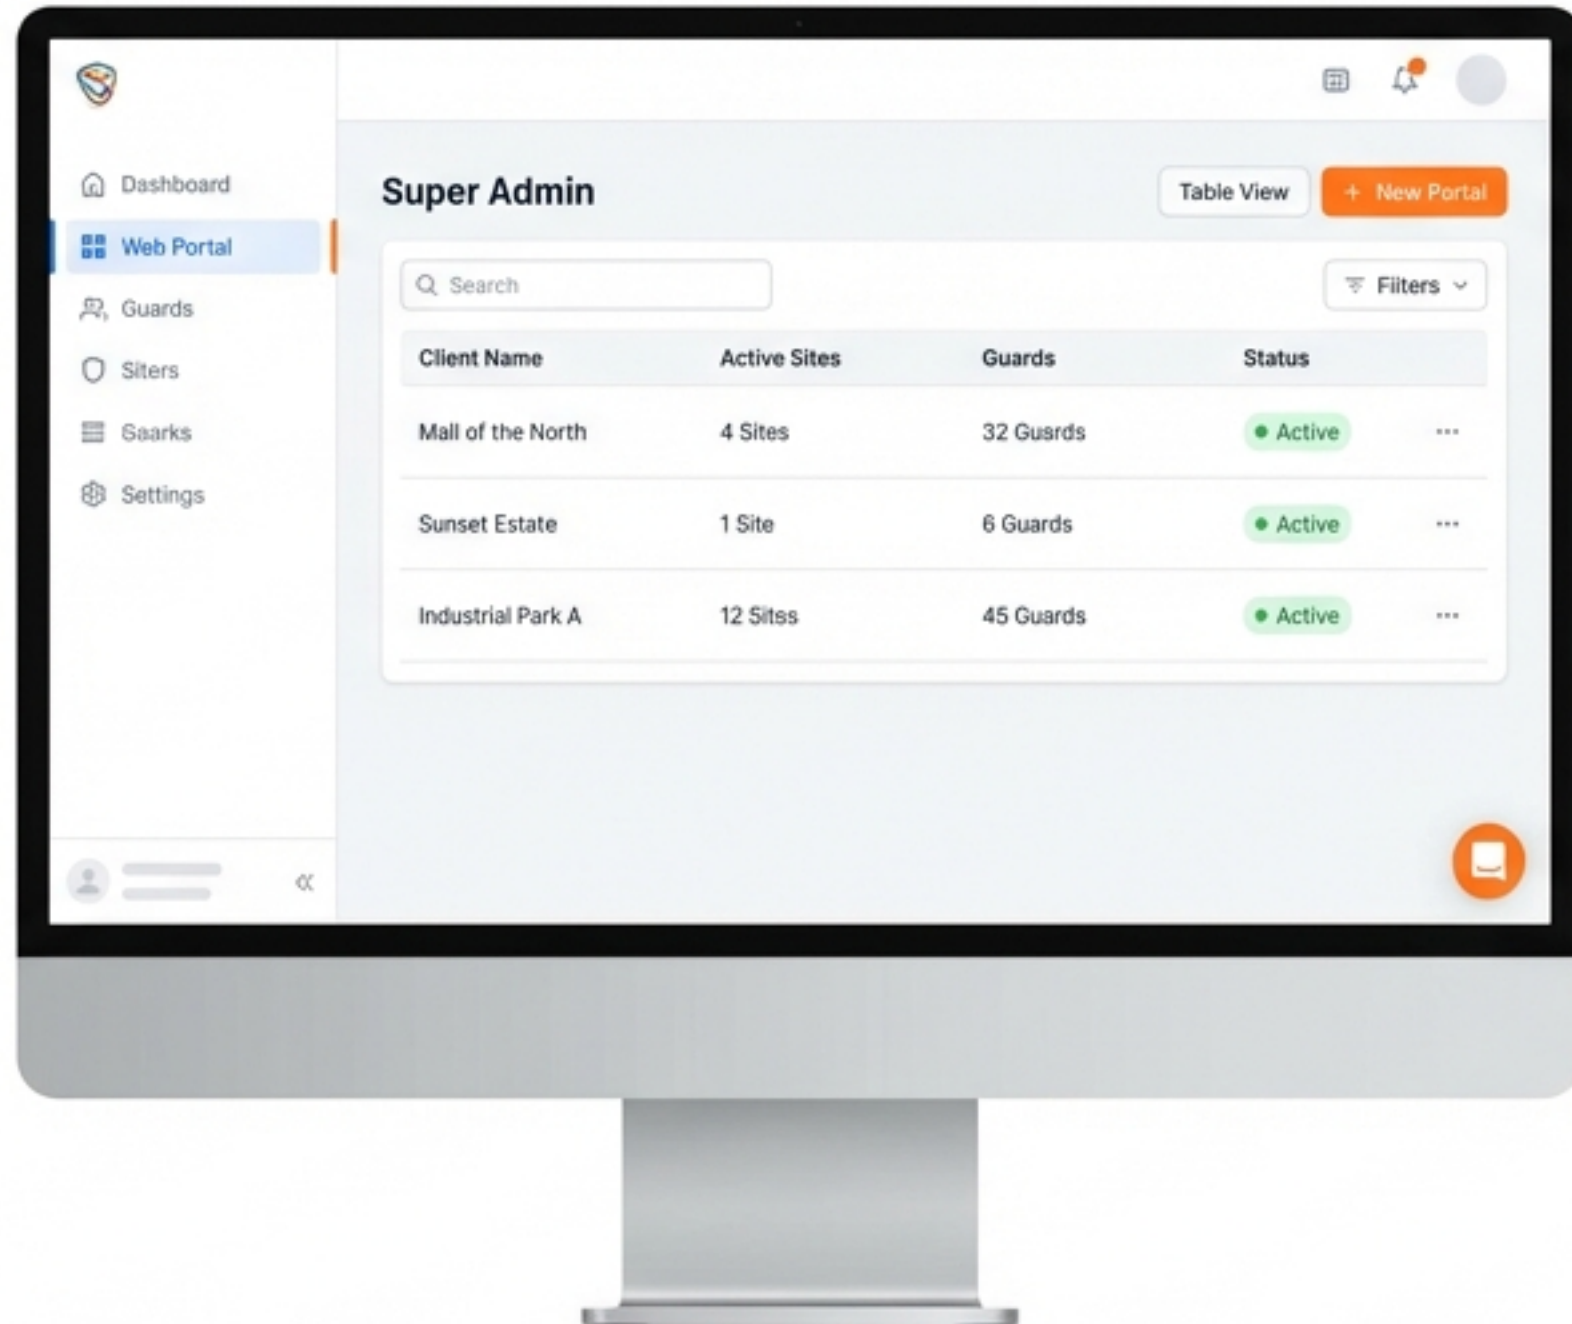

Example Unit Economics

Retail Price to Client: **R80.00** / guard

Wholesale Cost: - **R30.00** / guard

Net Profit: R50.00 / guard / month

Manage Your Entire Portfolio

One portal to rule them all. The Reseller Dashboard gives you oversight of all your clients.

- **Client Management:** Add new sites and users instantly.
- **Hardware Management:** Issue QR codes and NFC tags directly from the backend.
- **Billing Overview:** Track active users across all deployments.

Frictionless Onboarding

Get a new site running in minutes, not days.

- 1. Manager Walkthrough:** Use the app in 'Programming Mode' to walk the site, drop GPS pins, and name checkpoints on the fly.
- 2. Flexible Tags:** Mix and match to suit the budget:
 - **NFC:** High security for critical points.
 - **QR Codes:** Low cost for general areas.
 - **Virtual GPS:** For perimeter fences.

Enterprise-Grade Foundation

You sell the service; we guarantee the uptime.

Cross-Platform Mobile

High Performance

High-Speed API

Scalable Backend

Cloud Infrastructure

Global Reach

Scalable Database

Reliable Data

- **Proven Stack:** Built on the same architecture as SabreVisitor.
- **Reliability:** 99.9% Uptime guarantee.
- **Security:** Cloud-hosted with robust data protection.
- **Scalability:** Ready for single sites or massive multi-national corporates.

We Back You Up

Sales Enablement

White-label marketing materials, demo scripts, and comparison sheets provided.

Technical Training

Full training for your installation and control room teams.

Priority Support

Direct line to our dev team for critical issues.
